

## **SCION 7 Color Illuminated Door Sill and Interior Light Kit**

The Scion 7 color interior light kit and illuminated door sill kit were designed to work individually or as a combined set. When combined, both kits will change colors simultaneously to the same color. Please see operating instructions below on how to change the color.

## **SCION 7 Color Illuminated Door Sill Kit**

### **Operating Instructions:**

The illuminated door sills will light up whenever a door is open. When the switch LED is illuminated, the color of the lights can be changed by pressing the switch button. The color selection will cycle through the following colors:

Blue → Turquoise → Green → Yellow → Red → Purple → White → Blue

## **SCION Interior Light Kit**

### **Operating Instructions:**

There are two modes of operation for the interior light kits:

#### 1) Doors Closed

The interior light kit will light up with the key in the ACC or ON position. When the switch LED is illuminated, the color of the lights can be changed by pressing the switch button. The color selection will cycle through the following colors and an OFF position:

Blue → Turquoise → Green → Yellow → Red → Purple → White → Off

#### 2) Door Opened

The interior light kit will light up if a door is open (even with the key in the OFF position). When the switch LED is illuminated, the color of the lights can be changed by pressing the switch button. The color selection will cycle through the following colors:

Blue → Turquoise → Green → Yellow → Red → Purple → White → Blue

**Note:** If the color selection is set to the OFF position with the doors closed, opening a door will turn the lights on to the Blue color.
